Botter 74 Tibia 26 is a MMORPG developed by CipSoft and released in 2007 that has been played over 100,000 times. The game takes place in the realm of Tibia (Teibia) and is played as a massively multiplayer online role-playing game. Botter 74 Tibia 26 is about the struggle between opposing factions (/players) for supremacy, power, and glory. There are four main races: elves, dwarves, humans and ogres. The ogres, who have an innate ability to cast the fire spell at a young age, have been ruled by a tyrant king for several years. The king is a twisted man, who is willing to sacrifice anything and anyone at the expense of power. One player has chosen to play as an ogre. His name is Secbob and he plays from Finland. In this article we explore how Secbob has become the most feared character in Tibia. Secbob was already well known in Tibia 26 before he surpassed Botter 74's score of 486 million experience points (XP). His story began in 2004, when he first started playing Tibia. He played for several months, before other players discovered that he was using bots to play the game for him while he slept. Secbob was banned for this infraction. Although his account was banned for life, it was not long before the player returned with a new account. This time he played under the screen name 'Secbob', which has since become his alias within the game world. His botting continued for several years and Secbob became known as one of the best players in Tibia 26 despite being a cheater. The game itself has several positive aspects that draw players in. These features include the ability to become very wealthy, the chance to become powerful and respected, and to build an empire. This is not limited to high level players, but also helps beginning players find their way. The game's rules are not too strict or complex. You can take your time learning the game instead of having someone continually yelling at you for mistakes you made because you didn't know better. Secbob is an excellent example of the positive aspects of the game Tibia 26. Due to his cheating ability he was able to rise up to power very quickly. The combination of his botting and hard work made him a giant as far as power goes. Despite the fact that the players were upset with his cheating, he learned what he needed to do to succeed and applied it. Secbob is not just a powerful player who has gained money and fame, but also a leader. He has even taught others how to use bots and they can now be found in many other games using them successfully. The following example illustrates how Secbob's cheating ability has made him so successful in Tibia 26: Secbob purchased one of the most powerful weapons available for sale: The Shield of Valor ('SOV').
