In this epic saga from Walt Disney Animation Studios, a young boy named Jack journeys to a magical world where he must fight to save his friends and save himself at the same time. Along the way he discovers that his true power is greater than he ever knew, and with the help of others, he can become the hero his friends have always needed him to be. Inspired by Walt Disney's classic animation Snow White and the Seven Dwarfs, along with characters and storylines from Sleeping Beauty and Cinderella,

Jack and his newfound companions embark on an action-packed journey that proves courage is never more than one big thumbs up away. Join Jack and his friends to find out how far his self-confidence will take him when he takes up the mantle of a true hero. In Disney's "Frozen," an all-new short film by the masterful directors of "Frozen" and "Oz the Great and Powerful," two childhood best friends, Anna and Elsa, face the truth of their magical powers and their future together. When a snow storm traps Anna at the North Mountain, she embarks on a journey to find help. There, Anna meets the rugged and rugged-hearted mountain man Kristoff and his loyal reindeer Sven, whose calm and confidence helps Anna unlock her powers. His journey leads Anna to a strange and unexpected place where she meets the Queen of Arendelle and makes a surprising connection to her magical world. From "Frozen's" team of Oscar® and Emmy®-nominated director Chris Buck (Winnie the Pooh) and Academy Award®-winning director Chris Williams (Wreck-It Ralph) comes a must-see, all-new short film. Animated in beautiful 2D, a visual treat for all ages, "Frozen" is part of the Walt Disney Studios short film collection, which also includes "Pete's Dragon," "The Good Dinosaur," "Zootopia," and "Moana."
