Similar books: Wu-ki Tung- Group Theory In Physics-world Scientific Publishing Company (1985) (1) [60q14yvmn8q2] Science is a human construct to explain the physical world in a rational and orderly manner, in accordance with physical laws. It is a tool of humankind that serves as a mirror of human knowledge and understanding of the world.The goal of science is to use reason to formulate true statements about the nature of the world and ourselves.Science in itself is not a value judgement or an attempt to prove something, but merely the scientific method. It is a set of techniques that we can use to discover true statements about the world. The method and the truths discovered through it are equally valid and objective regardless of whether they are statements about humans, God, society, or nature.Science, through the process of observation, manipulation, and testing, seeks to understand the world.This book presents a unified understanding of the concept of group theory in physics, and the solutions to the nine fundamental problems of classical mechanics. This book will be useful for both the undergraduate students as well as the graduate students who want to understand the solution to the nine fundamental problems of classical mechanics and group theory in physics.Wu-ki Tung-Group Theory in Physics World Scientific Publishing Company (1985) (1) [60q14yvmn8q2].pdf, [], 2829 kB.
