Shane Raymond, The Huffington Post, December 18, 2015  
Category:Meat by animal Category:Horse meatQ: Why does an  
image loaded via jQuery not work? I'm loading an image using  
jQuery like this: `var container = $('.slideshow').find('img');`  
`container.attr('src', "");` `container.addClass('myclass');` It works. The  
image gets added to the DOM and is styled like any other element.  
But when I do this: `var container = $('.slideshow').find('img');`  
`container.css('background-image', 'url(');`  
`container.addClass('myclass');` It no longer works. The image is not  
visible. I'm using Chrome, if it matters. A: The last line, `.add`
