Detection of airway inflammation in man by polychromatic flow cytometry: a pilot study. A method is described for detecting and quantifying the inflammatory state of the lower airways in man. This method is based on the demonstration of neutrophil-specific antigens on the surface of epithelial cells in the bronchial mucosa, and on the release of intracellular granules containing the same antigens and markers of leukocyte activation (degranulation). The cells are simultaneously identified and quantified by two-colour flow cytometry. The method was applied to the study of 30 patients, including asthmatics and controls. Immunologically-defined bronchial neutrophils were found in patients with chronic obstructive airways disease (COAD) (P less than 0.001). Moreover, immunocytochemical staining of neutrophils in the bronchial mucosa showed increased expression of the neutrophil-specific antigens on cells within the lamina propria, suggesting mucosal activation of the neutrophil population. The method described has considerable potential for the study of the relationship between these inflammatory changes and disease.
About Our School
The Mission of the North Bay School District is to: Provide a diverse and comprehensive program of educational opportunities to prepare students to succeed in a complex society. Enhance the social, emotional, physical, and cognitive development of all children by maximizing each child's ability to learn in the context of his/her family, community, culture, and society. Provide a safe and welcoming learning community for all students to develop positive relationships with their peers and their teachers, and to learn together. Enhance the academic achievement of all students by providing challenging and engaging learning experiences that promote optimal learning environments. Enhance the cognitive, critical, and creative thinking skills of students through a variety of curriculum delivery methods. Achieve Academic Growth Our school provides a compassionate, supportive environment for our students to strive for academic excellence. We know that engaging students in a challenging academic environment is the best way to keep them learning. We regularly conduct state-required standardized testing, use curriculum-based assessments and assess for a variety of other learning opportunities. Each year our school takes part in the Title I Academic Growth Initiative. In order ba244e880a
