Key Macro is a unique keyboard recorder tool that allows you to record or repeat any of your keyboard actions. As an extremely useful, FREE tool, Key Macro helps you to store and restore all your often-used keyboard combinations. It records all your actions in a database file, allowing you to copy and paste them whenever you want. Key Macro stores all your shortcut actions in a simple, customizable database, allowing you to customize the behavior of each shortcut action. You can also choose whether to automatically re-record when the app loses focus or not, and if you want the app to clear its database automatically. Furthermore, it offers easy database backups, making sure to preserve all your settings. Features Key Macro is a reliable app that enables you to capture all the key combinations and all the shortcut actions you use frequently. It's very easy to use: just create the database and add a shortcut action or a key combination. You can even create macro combinations that re-run an action or a shortcut action. You can also customize the settings and the behavior of each shortcut action. Once you're done, you can choose the best working options for your computer or device. The settings panel has a lot of options that allow you to configure the app as you see fit. You can export your database file to PDF or Excel. The app has been tested for compatibility with Windows 10. Evaluation and conclusion We liked Key Macro's intuitive interface and its variety of features. The tool comes with a database file with many different combinations. Unfortunately, there are no web shortcuts or shortcuts to other apps. We also noticed that some settings were missing in the final version. Key Macro has more than 10 years of experience in the software development business and has been receiving positive feedback from users in the Windows XP and Vista era.
