[↗](#) Added "Sliding Menu" feature. [↗](#) Added "Away" message and auto reply when set "Away". [↗](#) Added option to load alternate server list. [↗](#) Added option to load alternate configuration file. [↗](#) Added option to suppress DCC and CTCP requests. [↗](#) Added option to enable sound events. For example; users joining and leaving channels
ChinWag IRC Feedback: I am a newbie using ChinWag IRC. My question is about the sidemenu. It must be easier to read for newbie than screen. I understand the concept of icon beside every word. I just wondered if the sidemenu is a way to make a user write more characters per line. Just one thing: when i restarted, the icons didn't all appear, and i had to add them manually. Is it a problem with the icons file or something? I'm using ChinWag (V.0.97.1-dev.1) on Debian (Lenny) 5.0. I'm just a newbie with ChinWag. Thank you. Please, ask if you don't understand something. Comments: ChinWag IRC is a IRC Client using GTK, X Window and GTK libraries.
