To send a message:

- Type the letter in the box at the bottom of the screen.
- When you have finished typing click the "Send" button.
- The code will flash on the screen and be transmitted.
- If you are sending a message of variable length, please note that Morse Machine only displays the first 20 characters of your message.

To receive a message:

- Click the "Receive" button.
- Morse Machine will then flash the character code in the "What's New" box at the bottom of the screen.
- When you have finished receiving Morse Machine will then type out the message received

Morse Machine is a combined Morse tutor and reader program which may be useful to anyone learning Morse Code. The program is user friendly and allows the user to communicate with other Morse operators by sending and receiving Morse messages. The program also features a library of Morse messages which the user may download to practice communicating with other operators. In addition to Morse Machine's unique user interface, the program features an automatic and accurate Morse Code Reader which allows the user to accurately and efficiently read Morse Code messages. Morse Machine is completely automatic with the aid of a large database of codes which are placed in the program for the user to download at their leisure. The program automatically checks the incoming message's error rate and alerts the user if the incoming message is too poor for Morse Machine to display properly. At the same time, the user is given the opportunity to correct the message to receive a proper display of the incoming message. The user also has the ability to download the correct Morse

Code message and have it displayed in the Morse Machine user interface. The user can then compare their new message to the original message to verify their accuracy.
