* **Brushes** : A set of shapes in Photoshop for drawing. The results, like an ink drawing or watercolor painting, are known as `_vector_` or `_flat_` (not deep or 3-D). * **Brush collection** : A set of brushes that you can apply to an image or even a group of images. You can use the same image as the source for all brushes, or you can choose a file. If you open a brush collection, you can apply the brushes to any image you have selected or to any document you have opened. * **Channels** : Similar to layers, they represent a set of selections that you can independently adjust. However, each channel also has a roughness value that determines how much control you have over the appearance of the channel. You can use a set of channels to modify the appearance of an image by increasing or decreasing the transparency of each channel. * **Clone Stamp** : One of the most useful tools for creating freehand masks or a pattern for compositing. Photoshop has many practical ways to use the Clone Stamp. You can use the Toolbox, the Clipboard, or the Brush tool to create a clone. * **Clipping mask** : A concept that is a great way to isolate a portion of an image, such as an object in a photo, and apply the action to the portion so that the rest of the image appears untouched. Clipping masks are available as a feature in some applications, and not others. * **Color Palette** : This is a function that enables you to quickly access a set of color palettes to apply to an image in a specified color range. Photoshop has many color palettes available in the Edit menu, including the Free Selection option that lets you select a specified color range to change the appearance of that range. * **Color Range** : This is a feature that uses a series of color tools, such as a light tool or a dark tool, to select a color in an image. You can place the color selection over multiple areas within an image. * **Color Selection** : These tools are based on user-defined colors and work like a brush. You can apply the selection tool to an image or group of images and select the color you want to change. * **Color Picker** : This tool allows you to select colors in an image in a color wheel or palette. You can use a color wheel or

Q: How to make loading spinner in bootstrap i am creating my project using bootstrap.I need to show loading/spinner in the middle of my page while i am using ajax call for get data from database.I am using jquery and jquery validator for validation. Can any one tell me how to use? A: You can try below code: `$('#body').ajaxStart(function() { $('#.ajax-load-more').html(''); });`
`$('#body').ajaxStop(function() { $('#.ajax-load-more').html(''); });`; When ajax request fired then html of ajax-load-more class will changed to fa-spinner fa-pulse animated rotln which is displayed as loading icon. A: Try this: Here's a simple example `/* * This file is part of Cockpit. * * Copyright (C) 2018 Red Hat, Inc. * * Cockpit is free software; you can redistribute it and/or modify it * under the terms of the GNU Lesser General Public License as published by * the Free Software Foundation; either version 2.1 of the License, or * (at your option) any later version. * * Cockpit is distributed in the hope that it will be useful, but * WITHOUT ANY WARRANTY; without even the implied warranty of * MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.
