

Some of the key changes FIFA 22 will bring are: Goalkeeper AI - Goalkeepers will now react more naturally to key moments in the game. They will make more saves, show less caution, and encourage more attacking play from the team. Deleting players - Deleting a player creates a gap in the starting lineup. The new AI will then reorganize the squad to maintain balance and cohesion. Tackles - Players now lay realistic challenges by damaging their opponent. A player with more momentum will drive towards his opponent and attempt to take him down, while an opponent nearing his end in the match will attempt to drive a more strategic tackle. Passing - Players now look to pass accurately and intelligently to create attacking chances. Flaws - Players now possess an awareness of their positional weaknesses. Defensively, they will attempt to shield their weaknesses against quick attackers, while offensively they will attempt to exploit the defensive weaknesses of opponents. Skill and Manoeuvring - Players now possess the finesse to turn and cut off each other on the move. They will use the space around them intelligently in the final third of the pitch. Instincts - The game has been rebuilt to help players make split-second decisions in the heat of the moment. Players will change direction, drop deeper, and then perform aggressive, risky behaviour in the most critical moments of the game. Depth - With the ability to customize formations, up to three players can now switch from defence to attack and vice-versa at any time. Misc. Improvements - Changes to the Dribbling engine mean players more accurately dribble past the opposition, as well as pass the ball with more dexterity, and control. You can now dribble and pass with your whole foot, and you can hold the ball in the air while dribbling. FIFA 13's "Time-Warping" feature has been added. Time-Warping allows players to remap the on-field clock to go back in time. When activated, the on-screen clock will begin ticking from the time the action begins. Once the action finishes, the clock will move forwards an hour on the field, and your action will continue in the same way as it did before Time-Warping was activated. You can activate Time-Warping for a specific player. For example, if a player is about
