HyperMotion Technology in FIFA 22 In FIFA 22, we can able to see "HyperMotion Technology" Marker on the player who wearing the Motion Capture Suit (you can see the Player wearing the Motion Capture Suit on the below image). When we move the Player and tap on the HyperMotion Technology Marker, we can know a lot of information about the Player in 3D. Below shows, "HyperMotion" Panel on the Player List screen in FIFA 22. The most important information you can see from the above image is "Name" in the Panel. The "Name" is specific for the Player and its applicable for FIFA Ultimate Team and FIFA Seasons. The player name will be different in the official EA Matchday releases and the player name will be same in the other EA Online Leagues, such as the FIFA Interactive World Cup. The player name of the real-life player is also different than the name you can see on the FIFA Official Matchday releases. The name is taken from the official FIFA info page and not from the FIFA Ultimate Team or FIFA Seasons. Let's discuss other information such as the Name, Rating, Team, Position, League, and Invitation from the above panel. The Player Name will be matching to its alternative name in FIFA Official Matches. So, if we want to know the Name of the Player in FIFA 21, then we have to compare the name of the Player with the Official Matches. You can check the Player Name here.
