Video games are fun. They're also intensely controversial. Al Jazeera America is publishing a special series over the next few months called Inside the Box, looking at the world of gaming through the lens of the special report, Game Over. Here's part one of a four-part series. James McPherson in Brooklyn. James McPherson Sitting on a bench in front of Proctors, a cinema in Brooklyn's Williamsburg neighborhood, James McPherson is watching the cartoon masterpiece 'The Iron Giant.' James McPherson "That's just an amazing story and it's a beautiful movie," he says, on the last night of Game Over. James McPherson Back in Washington, James McPherson isn't sure of his own strength of will. He has just been summoned by an old friend, the chairman of the Federal Communications Commission, and asked to audit some footage. James McPherson James McPherson "The market is corrupt," McPherson tells his wife. "The market is a malignant dictator. It rules our lives." James McPherson "I feel like I'm going to need a drink," he says. "I've had a stressful day." James McPherson James McPherson He picks up his new best buddy, a dry-cleaner's coupon from the edge of the desk, and writes his signature across the back. James McPherson Alongside, he writes the legend that will be reproduced on shirts and T-shirts for years to come: It is the mark of a true Iron Giant. James McPherson James McPherson In a glass, McPherson puts the last of the whiskey. A vision comes into focus. James McPherson "Watch out for the things that are done in the dark," he says. "The truth is out there." Inside the Box is part of the American New Frontier series produced by Al Jazeera America and produced by Alexis Garcia, Ricky Strauss and Kate Amend. Returning to the United States under an alternative travel passport, I'm appalled by the glut of advertising aimed at people who aren't gullible, or stupid enough to fall for useless promises, and would never let the cost of anything entice them to

How broad-spectrum antibiotics impair the normal gut flora and facilitate a gut dysbiosis. How antibiotics use and misuse is having an impact on the flora of the human body and is disturbing the intestinal microbiome. Gut dysbiosis is reported to be associated with various diseases and metabolic disorders. Antibiotic-associated diarrhea (AAD) is a common side effect of broad-spectrum antibiotics administration. Areas covered: The review describes the effect of antibiotics on the normal gut flora and the impact on gut dysbiosis. Current theory on the mechanisms of AAD is presented and we look at the factors responsible for the emergence of resistant bacteria in AAD. Finally, we conclude by presenting guidelines on the use of antibiotics in the context of the evolution of AAD that impact on the gut microbiome. Expert opinion: The impact of antibiotics on the normal gut flora is well documented. Broad-spectrum antibiotics are mainly responsible for impairing intestinal flora and gut dysbiosis. Changes in intestinal flora can affect intestinal barrier and may lead to dysbiosis. The main risk factor for AAD is excessive dose of antibiotics. AAD develops in approximately 70% of cases and the risk of prolonged antibiotic therapy is four times greater than that of normal antibiotic therapy. AAD is more common in patients with neurological disorders, malnourished, or immunocompromised patients. One of the key roles of antibiotics in the gut dysbiosis is the emergence of multiresistant enteric bacteria that are transmissible. The rise of AAD is also associated with the emergence of resistant bacteria. To limit the development and spread of resistant bacteria, a daily break for several days is recommended after therapy. Although the use of the same antibiotic is of great concern, its use during therapeutic rounds is suggested. The association between sitting work posture and erector spinae muscle activity: A systematic review and meta-analysis. The sitting work posture is thought to be a leading risk factor for poor upper back health. The purpose of this study was to identify the relationship between sitting posture and the back muscles' activity. The PubMed, Ovid, Web of Science and CNKI databases were searched for studies that identified the correlation between sitting posture and either the spinal extensor or flexor activity. The methodological quality of the included studies was assessed by two independent assessors using the Downs and Black Checklist (DBC). Meta-analysis was performed for the correlation between sitting posture and flexor or extensor activity of the erector spinae muscle (ES
